Proper Care & Maintenance of Polytech Windows & Doors

Care For Vinyl Surface

Vinyl is easy to clean and requires only diluted dish detergent and water to clean and retain shine. Dust and pollution dirt are normal and easily cleaned. Do not use abrasive cleaners, solvents, or stripping compounds. For tough marks or dirt, try nonabrasive kitchen cleaner creams or automotive vinyl cleaners. Some marks such as felt tip pens penetrate the surface and should be professionally removed.

Caring for Hardware of Tilt and Turn Windows & Doors

Once a year, all moving contact points should have a light spray of silicone lubricant

Caring for the glass

Use normal household glass cleaner
